## Side advertising

On the sides of the product, it is optional to install LED screen or advertising banner which can realize the advertisement in all directions.

### Multi-functional strengthened road sign

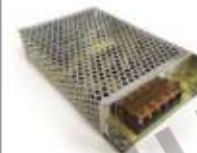

The frame of the road sign is made from galvanized steel by cold stretch, side components are installed on the metal sheet frame, which is more safe. There is LED light inside the road sign; there is reflective indicator label, which can alarm the vehicles and pedestrians. There is water leaking hole on the frame, and the filter can prevent dust and insects getting inside.

## High-performance electronic parts

Automatic scrolling control system makes canvas more steady while scrolling; numerical programming with the features of convenience and easy control. The power of screen scrolling is from high-performance motor which is powerful, safe and reliable, noiseless with longer service life.

High-performance motor

Stable power supply of control system

Automatic control rolling system

Reliable LED Control System

## Automatically fire extinguishing system

The product is equipped with fire-extinguishing device, when there is fire in the inner body, this device will automatically extinguish the fire to prevent damages.

This is just design showing, actual invention is from metal.

### USB charging device

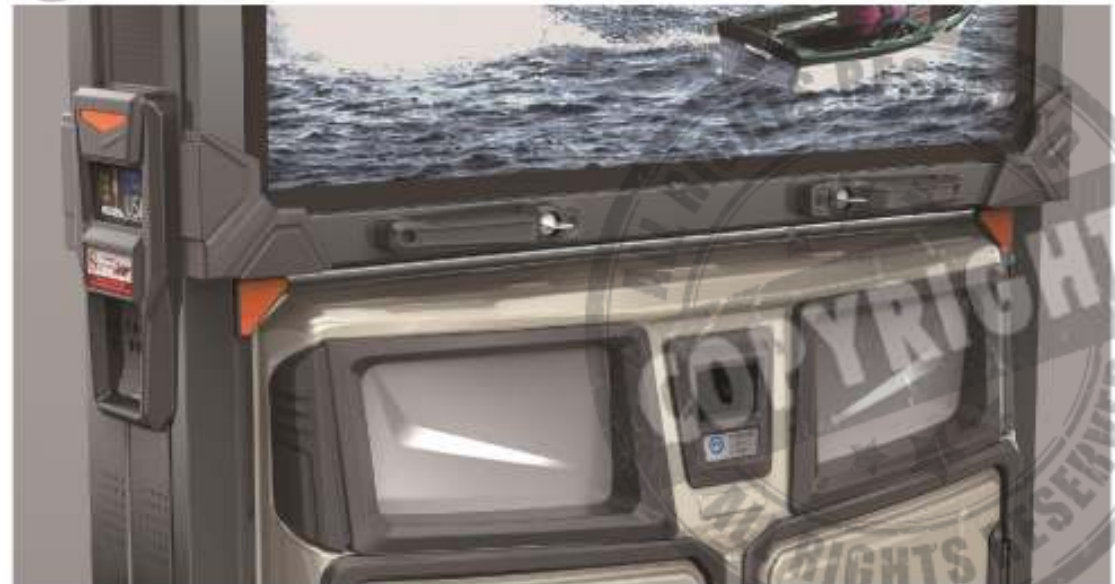

The product is designed with public USB charging device, which can not only meet the charging demand of pedestrians, but also raise the attention to the advertisement. There is an indicative label which can make the USB easily found; in the night, the indicator lamp guides the pedestrians to find the USB port easily.

Night Light

### Multi-functional slot

This advertising light box is designed with the slots for general waste, recyclable waste, electronic waste and cigarette butt.

### Air ventilation device

The product is equipped with fire-extinguishing device, when there is fire in the inner body, this device will automatically extinguish the fire to prevent damages.

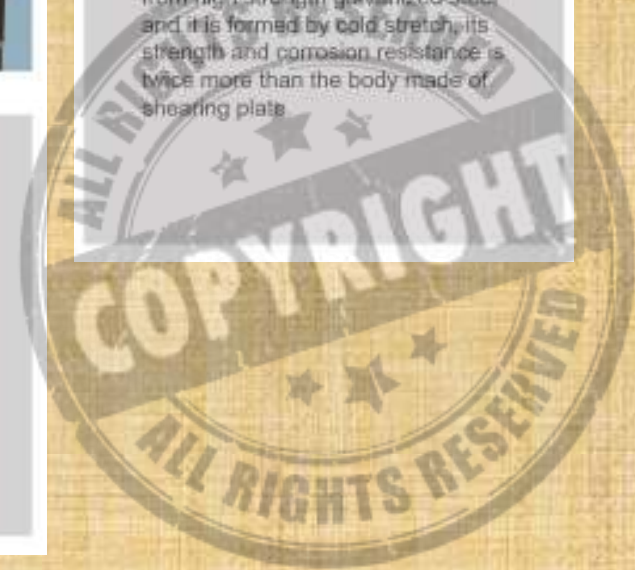

### Handle

On the glass frame there are two handles which make it more convenient to open or close the frame.

### One-piece dustbin box

The body of the waste bin is made from high strength galvanized steel and it is formed by cold stretch, its strength and corrosion resistance is twice more than the body made of shearing plate.

### Cigarette butt collection device

On the bottom of charging device, there is cigarette extinguishing plate and collection box.

### Reflective label

On the product there are reflective labels which can alarm the vehicles and pedestrians in the night.

### Enhanced glass frame

The glass frame is welded from bending forming galvanized steel sheet; the tempered glass is installed on the frame after gluing on the back, there are pressing plates on the sides and top which can make the glass fixation stronger.

### Cigarette butts and batteries input window

Perfect design, with butts and batteries windows on both sides frame is fabricated by punched molding partly. The frame is molding punched, makes the AD dustbin with good looking appearance.

### Wood Grain Of Engineering plastic

Wood grain of engineering Plastic is a new kind of environment friendly material, with superior weatherability and aging resistant, without deformation, depigmentation or clefts after a long time of outdoor use, service life is longer than high class timber.

### High quality tempered glass

---

High quality tempered glass, 3C certification approval, with steady quality and high safety, significantly prevent the glass from heating-break.

### Ventilation Device

---

With ventilation device, can effectively improve motor lifetime.

### Strong integrated frame and waterproof design

The product frame is stronger integrated with steadier structure, waterproof frame can easily prevent the inside electronic parts from damage.

### Warning light-reflection stickers

On the side of the product has a warning light-reflection sticker, which keeps the bin safe in the dark night.

### Multi-function light box

Sign frame is made of bending galvanized steel plate, more secure and firm, the sign has LED lights inside so that people can see the clothing-donation bin at night.

**Items input window**

The item input window is designed with an upward slide, which can effectively prevent rain and trash going into the bin. There's a viewing window on the door and a light inside the bin, you can view the items when you turn on the light.

Turns head, viewing window, internal light of the bin

**Large storage space**

The volume of the storage space is up to 118L, which can greatly satisfy the needs of donation.

**Reinforced bottom**

The bottom is made of iron plate, welding with bending, galvanized steel plate, thickness is 1.5mm, the strength and stability are 2 times more than the ordinary metal bottom.

1.5MM THICK GALVANIZED STEEL PLATE

Single system one-side rolling

**Large advertising area**

The product is designed with large advertising area up to 1.85 m<sup>2</sup>.

High-performance display

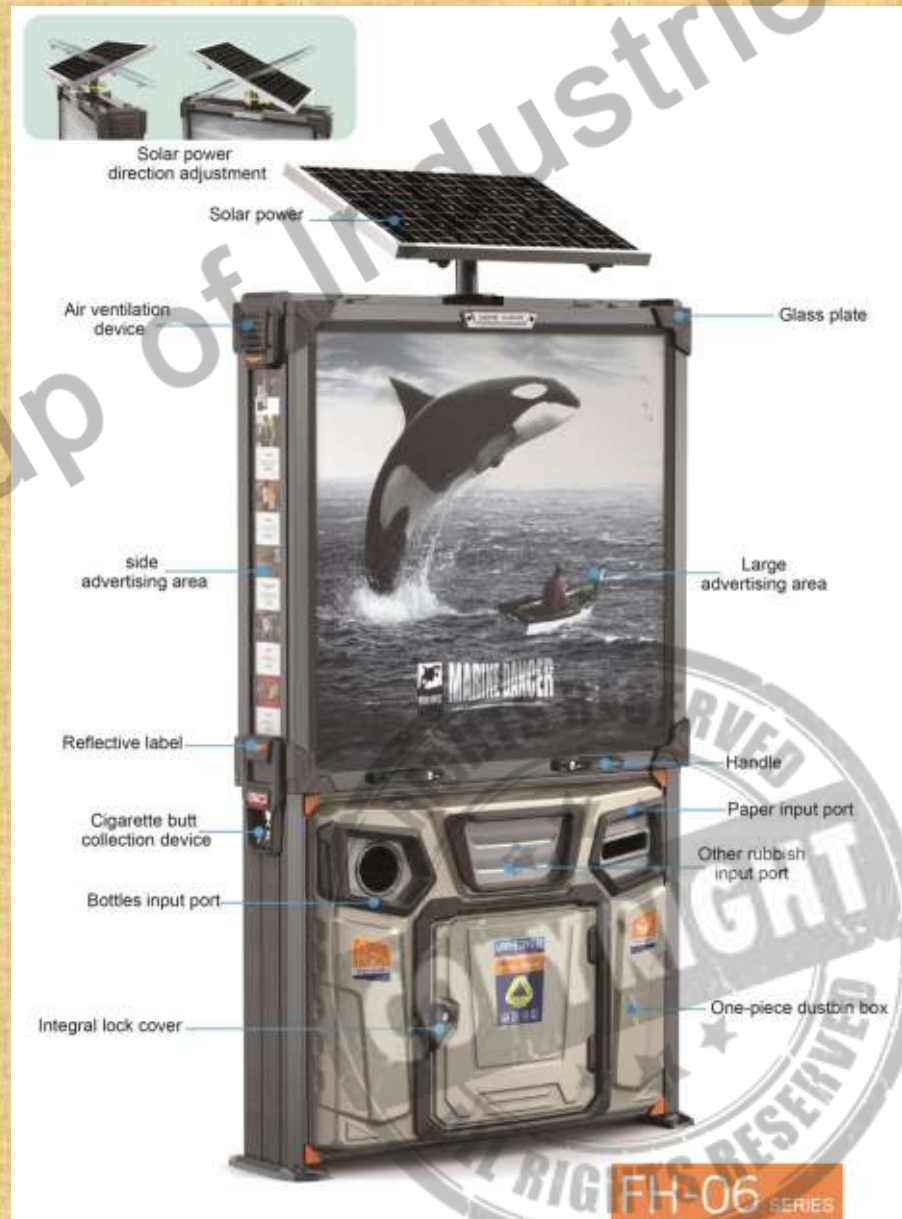

Automatic control system

Flexible LED Control System

High-performance control system

**High-performance electronic parts**

A high-performance control system makes service more easily with accurate, numerical programming and settings of dimension and easy control. The product is designed with high-performance electronic parts, which can greatly satisfy the needs of service.

# BENEFITS

- Helps in advertising various kinds of products like advertisement of in-store and existing brands.
- Eradicate the manual material scavenging system.
- Appealing to the foreigners and tourists in the city.
- Motivates the public to maintain a clean environment and use these garbage bins to put their waste which in turn will lead to our participation in the Swachh Bharat Abhiyan to keep our surroundings clean.

# BENEFITS

- Attractive to the eyes of general public. It will also lead to beautification of malls and premises or any other place where it has been installed.
- It also beneficial from commercial point of view as it will generate revenue by the display of advertisement.
- Implement of proper waste management through scientific processes, hygienic disposal, reuse, and recycling of the solid wastes which will lead to a more cleaner environment.
- Make India a clean and green India.

# PLACES TO DISPLAY

- International Airport
  - Domestic Airport
- Beaches/Public Places
- Municipal Corporation
  - Passport Offices
- Government & PSU Offices
- Other Tourists & Public places
- Malls/Cinemas/Amusement Parks
  - Corporate offices
  - Hospitals/Banks
  - Railway stations
